As per independents claim 9 and 17, the prior art fails to teach or suggest the combinations recited, and in particular a power management unit/step to selectively throttle the core based on the first thermal data, the core thermal data, and the electrical data. As per independent claim 23, the prior art does not teach the multiple threshold power consumption control combination as recited.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
